Cynthia,

This project is the proposed I-73 interstate project. Review time has been extended due to SCDOT requiring additional time to formulate a compensatory mitigation plan. The most current iteration of their mitigation plan stated in its summary that it supplied an inadequate number of credits. Therefore, we still find the plan lacking and are awaiting a response to our last comment letter.

Hey Kelly,

I have a project on the Congressional Report that needs your updating immediately. We need to send the report to OMB today preferably.

We have SAC-2008-01333 as having 76 days of review. When we send the report to Congress, we provide an asterisk and explanation for any review period longer than 60 days. Can you please provide a 1 sentence explanation for why the project is over 60 days of review?

It can be something as simple as “comment period extended” or whatever the case may be.

Thanks,

Cynthia
